

TechRadium and The Catholic Church

TechRadium has serviced the Catholic Church's mass communication needs for many years now. We have designed an outreach program specifically for the Church and would like to continue our services to you. We are preferred vendors of Catholic Mutual and the National Catholic Risk Retention Group and are currently being used by the Archdiocese of New York, Galveston Houston, Mobile, Boston, Memphis, Spokane, (soon to add Baltimore) as well as many other dioceses around the nation.

The IRIS system gives the church the ability to reach out and contact parishioners, staff, students, and volunteers by phone, email, and text messaging at a speed of 8,000 calls per minute. Unlimited usage, unlimited groups, and unlimited administrators are included. Instant conference calling, polling (2 way communication), and even GIS mapping with active weather are all available at no additional cost. Schools, Chancery, Catholic Charities, ministries, hospitals and youth groups use our services consistently. Churches even send out prayer requests!

Wave Tektronics' would like to help even more! Our overall goal is to enable the Holy Father to send a prayer in his own voice to every Catholic in the United States for Easter and Christmas! Lofty? Yes. But communication is key to being proactive! With the way the world is today, Catholics need to be stirred up. We need to be inspired. We need to be able to act as a group and with communication; all of these things are possible. Please contact me for further information. This is an outreach program, so the cost is *less* than a half a penny a day.
